records solutions

ARIANE

ARIANE Healthcare

Records Management solution
for patient and medical
administrative files

- 1. Managing medical records** (patient files) **and administrative records** (emergency records, archives from Human Resources, Accounting, Real Estate Department etc.) in a flexible, secure and centrally controlled manner.

- 2. Managing requests for access to medical records**

Ariane Healthcare enables to follow up external demands made by patients or someone legally competent, while respecting the time constraints, supporting documents and other issues related to this procedure.

- 3. Digitization of patient files**

Ariane Healthcare enables to dematerialize patient records and displays the result of this digitization in the module E-record.

- 4. Possibility to relate patient appointments with the relative patient files**

Appointment details and patient data are automatically extracted from Appointment scheduling program (ex. DxCare Planning, PDR Maincare, Easily Planning etc.), so that the relative patient files could easily be found and requested from the Archives service.

Why choose ARIANE Healthcare ?

OUR STRENGTHS

✔ Trace-ability of patient and administrative records

Trace-ability is reached through the use of data terminals and barcodes to identify and track files.

ARIANE Healthcare also enables to track consultation history (when and where records were transferred).

✔ Application integrated into Hospital information system

Via its connectors and the use of standards for transfer of clinical and administrative data HL7, Ariane Healthcare can communicate with different software applications of Appointment scheduling, such as DxCare Planning, PDR Maincare, Easily Planning and many others.
